

SCORE® PROGRAM

BY THE NUMBERS

1.6 MILLION

Estimated annual kWh savings

- HVAC Tune-ups – 189,485 kWh
- Lighting Upgrades – 171,599 kWh
- HVAC Upgrades – 513,991 kWh
- RMS (Resource Management Services) Savings – 700,338 kWh

\$142,000

Estimated annual energy cost savings

\$294,000

CPS Energy incentives received

CPS Energy offers a similar program, CitySmart®, for civil and government customers.

“CPS Energy’s SCORE Program has helped Judson Independent School District earn rebates, incentives and on-site studies that help us put more dollars back into the classroom and less on utilities. Our partnership gives us peace of mind knowing CPS Energy is always thinking about our energy needs.”

DAVID OEHLER
District Energy Manager, JISD

CASE STUDY

Savings are now in session

Score one to local schools

When it comes to saving energy, Judson Independent School District (JISD) has proved to be an excellent pupil. The school district was one of the first to enroll in the SCORE Program, the no-cost commercial energy efficiency program we launched in 2016 to help local schools reduce their energy costs with performance benchmarking, technical assistance and cash incentives.

The perfect school project

From lighting retrofits and replacements to high-performance HVAC tune-ups and system upgrades, the SCORE Program team worked closely with JISD to complete several energy-saving improvements throughout the district’s 30 schools. To get the most out of the upgrades, the district also took advantage of our benchmarking and energy master planning workshops and implemented a series of behavioral and operational changes.

Making the grade

The results put JISD at the head of the class. So far, the district has saved an incredible 1.6 million kWh, equal to the amount of carbon dioxide emissions from 140,000 gallons of gasoline.* Even better, we rewarded the district’s energy-saving efforts with a \$294,000 incentive. And with more large-scale interior lighting retrofits projects already underway, JISD shows no signs of slowing down.
